

Price List Kitto^{X} Framework: version 4.2.x

Valid from November 1, 2026

Versions

The **Kitto Framework** product, now in its fourth release, is offered in 2 different versions:

1. Kitto^{X} (Engine only) with Apache 2.0 open-source license
2. Kitto^{X} + KIDE^{X} Enterprise (commercial license + training and technical support)

The product license fee is charged on an annual basis. For the first year a welcome discount is granted.

The "Enterprise" version can be evaluated as a "Trial" version, during which it is not allowed to produce commercial applications, but only test applications.

N.B. Support for the old versions (Kitto1, Kitto2, Kitto3) has been discontinued.

Product Structure

The product is modular:

1. Base module (engine), local database connectivity
2. Advanced engine module, licensed, with Client/Server connectivity
3. Additional modules: ReportBuilder, Import/Export with Flexcel
4. Advanced components module: Charts, Calendar, Dashboard, Notification Center, Help Chat
5. Development IDE (KIDE)
6. Integration with InstantSolutions Framework (ISWorkbench with Kitto model generation)
7. Multilanguage support
8. Mobile device support (Tablet and SmartPhone)

The offer is aimed at 3 types of developers:

1. Single developer (freelance professional with VAT number)
2. Company small-team (maximum 3)
3. Company team (more than 3 developers)

The feature matrix highlights the different features of the Open-Source version and the Enterprise version.

Notice: Kitto^{X} no longer requires the ExtJS library (as it did in the past) but uses only fully Open-Source JavaScript libraries, such as HTMX, Alpine.js, jQuery, jSignature and Material Design Icons (svg).

Target audience – purchase options

The **Open-Source** version is designed for the development of small/medium-sized projects that do not require advanced features.

The **Enterprise** version is aimed at companies, from small work groups and small-teams (1 to 3) to larger teams (4 people or more). The repository is modular, which makes it possible to assign different parts of the model to different people and groups, who can then work in parallel without creating conflicts or bottlenecks.

The products must be purchased from Ethea, since they require a customized quotation, which can also include additional services, consulting and training, generally allowing you to become operational and productive more quickly.

A broader offering also allows us to propose bundles of products (licenses) and services at discounted prices, lowering the entry threshold for this technology.

Within these supplies it is also possible to arrange coaching on the first projects, enabling faster delivery and a more thorough evaluation of the Framework's effectiveness within the development process.

Annual license/subscription price list – summary table

A Welcome-Gift discount is granted for the first year

Kitto^X Framework	**FREELANCE**	**SMALL TEAM***	**TEAM (4+)***
Open-Source license (requires Delphi Professional or Community Edition)	**0 €**	**0 €**	**0 €**
Enterprise license with KIDE (requires Delphi Professional or Enterprise)	500 €	400 €	300 €

All prices are exclusive of VAT.

Feature Matrix

Framework – Feature	Kitto^X Open-Source	Kitto^X Enterprise
Kitto Engine (Delphi)		
- Model metadata (YAML files)	●	●
- View metadata (YAML files)	●	●
- Layout metadata (YAML files)	●	●
- Database access (via FireDAC, ADO, DbExpress)	●	●
- Database access (via ODAC)		●
- Desktop Mode (Embedded)		●
- Web-Server Apache, ISAPI, WebBroker	●	●
- LDAP login		●
- User/function profiling	●	●
Kitto WEB GUI		
- HTMX + AlpineJS client library	●	●
- Light and dark theme support	●	●
- Notification Center	●	●
- Help Chat	●	●
- Multilanguage support	●	●
- ReportBuilder printing tool*		●
- Import/export tool TMS Flexcel*		●
- Charting tool based on Chart.js		●
- Calendar Controller/View based on EventCalendar		●
- HTML Controller/View based on SunEditor		●
- Controller/View for Dashboard management		●
- Controller/View for Google Maps integration		●
KIDE - Advanced development IDE (Delphi)		
- Two-way Yaml editor		●
- Model import from database		●
- Menu and Home view creation		●
- Visual Editor (grid and layout) with automatic generation		●
- Code-checking		●
- Resource editor (images, javascript, css)		●
- Model generation/update from database		●
- KIDE source code		●
MCP Kitto X – Model Context Protocol for advanced A.I.-integrated development		
- MCP interface to create projects and update the model from database		●
- MCP interface to create/update Views and Layouts		●
- MCP interface to extract/update the multilanguage system		●
Integration with InstantSolutions Framework		
- Model generation/update from ISWorkBench		●
- Label synchronization (edit, list, hint, multilanguage descriptions)		●
Demo Applications		
HelloKitto	●	●
Taskitto	●	●
KEmployee	●	●
Sport Club Manager	●	●

** require a separate license for the Delphi libraries/components, which is not included in the Enterprise license of Kitto^X*
